Introduction

Value Stream Mapping (VSM) is the basic tool for implementing lean. Value Stream Mapping is extremely powerful in identifying and eliminating all kinds of wastages in the system. This can lead to substantial improvement in all kinds of processes. (Manufacturing, administrative, healthcare, service etc.)

This program is designed to equip participants in applying VSM techniques for breakthrough improvements in work flow, quality and cycle time.

Participation

Middle level process owners in all areas of businesses.

CONTENTS

DAY I

1. Introduction to lean
2. Introduction to VSM
3. Current State VSM
4. Future state VSM
5. Exercise – preparing the current state map

DAY II

1. Presentation of current state map by participants
2. Waste identification – Group exercise
3. Lean tools for eliminating wastages
 - a. 5 'S' & visual control
 - b. Kaizen
 - c. Balancing and flow

DAY III

1. Presentation by participants on improvements ideas generated
2. Development of future state map
3. Implementation plan
4. Q & A
